3. The following is an examiner's statement of reasons for allowance:

Claims 2, 3, 5, 6, 13, 14, 20-22, 30-33, and 37 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including the hollow conduit comprising a plenum extending around the axis of symmetry of the chamber and wherein the first and second openings are comprised within a continuous opening in the enclosure extending around the axis of symmetry of the chamber.

Claim 4 is allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including the conduit formed of a metal material, the conduit having an insulating gap within a wall of the conduit extending transversely to the torroidal path and separating the conduit into two portions so as to prevent formation of a closed electrical path along the length of the conduit.

Art Unit: 1753

Claims 7-11 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including the coil antenna comprising a second winding extending on an opposite side of and along the conduit.

Claims 15-19 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including an array of pairs of openings through said vacuum enclosure, each pair of openings near generally opposite sides of the workpiece support; an array of generally mutually parallel hollow conduits outside of the vacuum chamber that includes the one hollow conduit, and connected to respective ones of the pairs of openings, whereby to provide respective closed torroidal paths for plasm, each of the respective closed torroidal paths extending outside of the vacuum chamber through a respective one of the array of conduits and extending inside the vacuum chamber between a respective pair of the openings across said wafer surface.

Claims 23, 24, 27, 28, 34, 36 and 38-41 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including the height of the closed torroidal path along an axis generally perpendicular to a plane of the wafer support in a process region overlying the workpiece support is less than elsewhere in the closed torroidal path, whereby to enhance the plasma ion density in the process region relative to the plasma ion density elsewhere in the closed torroidal path.

Claim 35 is allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including a vacuum enclosure comprising a longitudinal side wall

Art Unit: 1753

and an overlying lateral ceiling, and wherein the first and second openings extend through the side walls.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
